STUDENT COUNSELLING CELL

This is meant for addressing issues related to PRE-ADMISSION and POST ADMISSION matter of students and providing them Expert Advice to resolve their issues, if any as a means of single window system.

OBJECTIVES

1. To address the problems/difficulties of students in support of admission to different programmes offered by the university (Pre-Admission Counselling)
2. To address all issues of students in support of their programmes immediately after the confirmation of their admission and during the course of continuing in the programme
3. To reduce the gap between the distance learners of the university and the Regional Centre/University.

It aims at reducing the gap between the students and the university.
